

Q How to change CimonX Logo into a different logo in UltimateAccess?

A Refer to the instructions below.

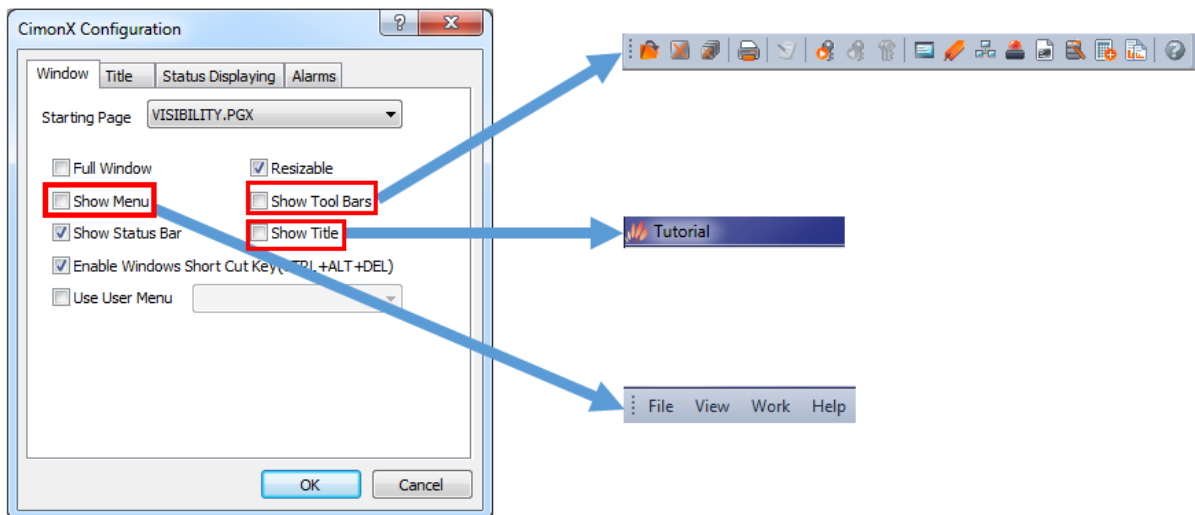

A user cannot change the CimonX logo unless it is OEM.

However, what the user can do is to hide the CimonX logo and embed an image of a different logo.

1. Tools -> CimonX Environment -> Window.

By checking the box for each item, a user can show or hide the selected item as shown below.

2. Toolbox -> Etc -> Image Embedding
